

**Dear Hiring Manager,**

I am excited to apply for opportunities where I can leverage my IT and cybersecurity skills to contribute to meaningful and impactful projects. With hands-on experience, a passion for solving complex problems, and a commitment to continuous learning, I am confident that I can bring value to your team.

During my internship with Providence, I helped build a KPI/KRI dashboard using APIs and Power BI. The dashboard was designed to display security threats and data visualizations, providing real-time insights into vulnerabilities and risks. I also gained valuable experience working with Workday software, where I contributed to system enhancements that strengthened security and streamlined user management.

In my current role as a Tech 2 at Amazon Corporate Security Badge Office, I manage security operations, including programming and removing access for individuals and groups using AWS tools like Webcat. I also monitor and manage access controls, verify site area managers through Orbit, and handle credential lifecycle management. My responsibilities involve collaborating with cross-functional teams to analyze access patterns, identify potential security threats, and ensure compliance with corporate security policies. By using advanced tools and maintaining a proactive approach, I help safeguard sensitive information and critical infrastructure in a fast-paced environment.

I have completed the Google Cybersecurity course and am currently expanding my knowledge in preparation for the CCNA and CompTIA Security+ certifications. I am also continuing my education to achieve my bachelor's degree, which further fuels my drive to expand my expertise and contribute to the cybersecurity field.

I am drawn to environments that foster innovation, collaboration, and adaptability. Whether it's designing secure systems, solving technical challenges, or ensuring organizational security, I am eager to make a meaningful difference in any role I undertake.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team's success. Please feel free to contact me at [work.jawad.naimi@gmail.com](mailto:work.jawad.naimi@gmail.com) or 253-329-9819.

Best regards,  
Jawad Naimi
